

Always at Your Service!

PURPLUS[®]

PURPLAN[®]

Global
Know-how partner

PURPLAN GmbH designs and delivers versatile plant solutions for the storage and processing of liquid and other chemical agents, many of which are hazardous or environmentally sensitive. We offer our customers state-of-art technologies based on latest know how and industry best practise: From the first planning phase through to the final commissioning and hand-over of the custom designed plant. Today we employ over 140 specialists at our premises and we together with our representatives around the globe, service international clients in countries such as Russia, China, England, France, USA, UAE, Austria, South Africa and Malaysia.
